

PORTABLE LEV SYSTEM

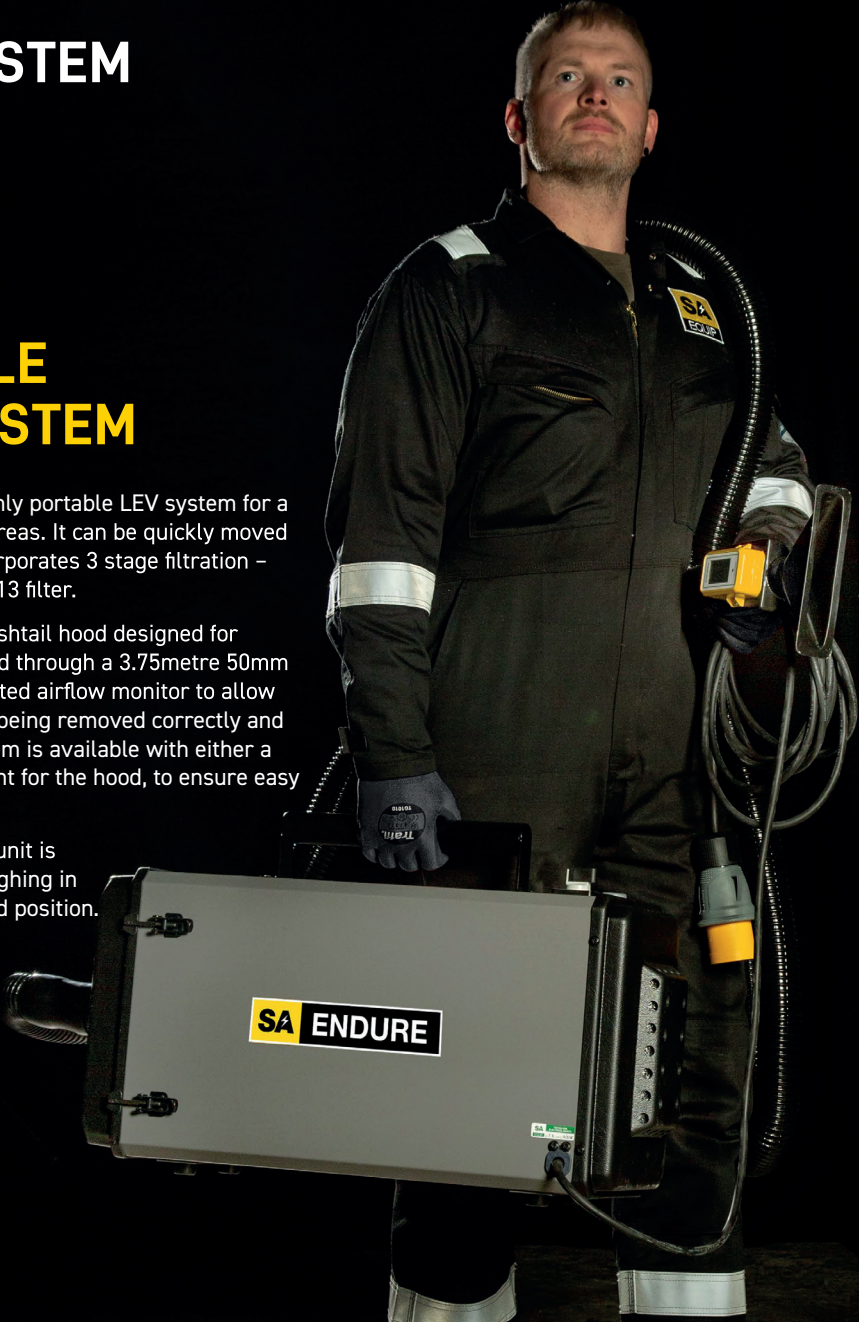

SAEWFP

HIGHLY COMPACT AND MOBILE SINGLE OPERATOR LEV SYSTEM

The SA ENDURE Portable LEV System is a highly portable LEV system for a single operator working in difficult to access areas. It can be quickly moved into place and set up in minutes. The unit incorporates 3 stage filtration – pre-filter, fine filter and high efficiency HEPA H13 filter.

Welding fumes are extracted via a dedicated fishtail hood designed for optimum efficiency complying with HSG258 and through a 3.75metre 50mm diameter duct. The hood is fitted with a calibrated airflow monitor to allow the operator to ensure the welding fumes are being removed correctly and that the set up is HSG258 compliant. The system is available with either a magnet attachment or a suction cup attachment for the hood, to ensure easy positioning right at the workface.

Airflow up to 280m³/hour is achieved and the unit is available in either 110V or 230V versions. Weighing in at only 18 kilos it is exception easy to carry and position.

BENEFITS

- Highly portable and lightweight
- Easy access to difficult work areas
- HSG258 compliant
- Suitable for extreme environments
- Hood fixing options
- Extraction hose flame retardant to UL94V0

SPECIFICATIONS

COMPLIANCE
HSG258

SUITABLE FOR
Welding applications

VOLTAGE OPTIONS
110vAC, 230VAC

AIRFLOW
Setting 1: 190m³/hr Setting 2: 260m³/hr

FILTRATION
3 stage, HEPA H13

MAX VACUUM
22kPa

POWER
2kW

DIMENSIONS
600mm x 220mm x 330mm

WEIGHT
18kg

CORE PRODUCT INFORMATION

SA ENDURE Portable LEV System
c/w Fishtail Hood and Magnetic Bracket 1x5cm
110VAC 32A
Order Code: SAEWFP300110/IEC/MB

SA ENDURE Portable LEV System
c/w Fishtail Hood and Magnetic Bracket 1x5cm
230VAC 16A
Order Code: SAEWFP300230/IEC/MB

SA ENDURE Hood Swivel Bracket Suction Cup
Order Code: SEHB/SCS
